Quick Notes

Thank you for purchasing Quick Notes.
This Manual explains everything about usage of this package.
For further assistance you can contact **durman.tolga@gmail.com**

Open Notes

To open note list menu window navigate to "Tools-> Quick Note ->Menu" or "Ctrl + Shift + Q"

Additionally you can open notes by double clicking on the specific note. On the project window.

New Note

To create a new note window navigate to "Tools-> Quick Note -> New Note" or "Ctrl + Shift + T"

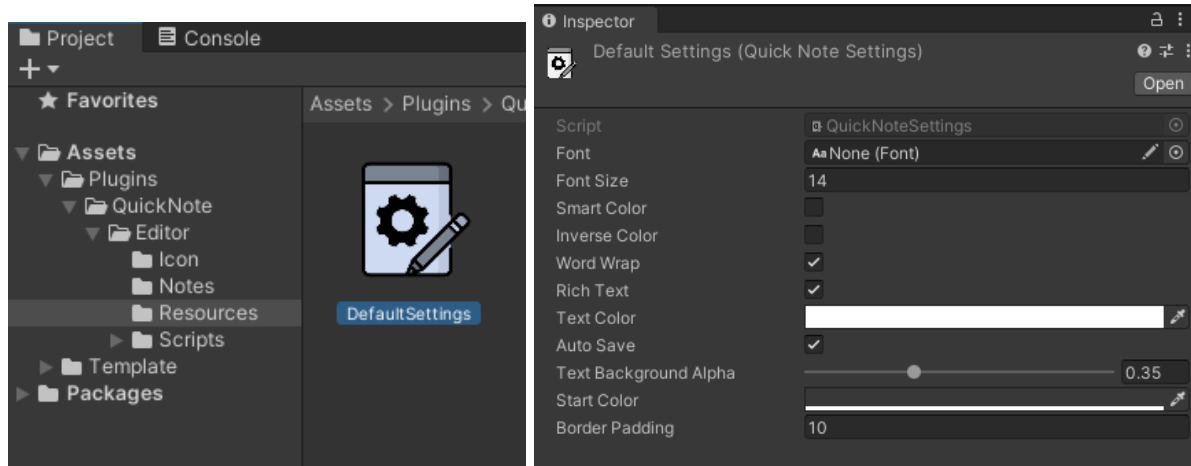

Customize Note

Quick Note windows are customizable via setting button located at top of the Quick Note Window

Additional Settings

For changing the default settings such as Font, Font Size, Text Color, Start Color, Border etc…

You can navigate to Plugins > QuickNote > Resources > DefaultSettings and change the default settings of the notes.

You can customize specific Quick Note Settings by creating new instance of this object and setting them directly to the desired Quick Note Object settings variable.

Upgrading

Upgrading from version 1.0 requires full cleanup before importing the new package.
Your old memos won't be available on the version 1.1 since 1.1 is created from scratch and has no backwards capability.
